DEVIXO SOLUTIONS

WEB DEVELOPMENT INTERNSHIP PROGRAM

TASK 01 — PROFESSIONAL PERSONAL PORTFOLIO WEBSITE

Student Name: Madiha Khan

Internship Domain: Web Development

Task Number: 01

Technologies: HTML5 and CSS3

Project Documentation Report

1. Objective

The objective of this task is to design and develop a modern, professional, responsive personal portfolio website using HTML5 and CSS3. The website presents the developer profile, skills, education, projects, and contact information.

2. Technologies Used

• HTML5 for page structure and semantic content.
• CSS3 for layout, colors, typography, responsive styling, transitions, and hover effects.
• Font Awesome 6.7.2 for interface icons via CDN.
• Local SVG icons and image assets for skills and portfolio content.

3. Website Structure

The supplied project contains **index.html**, **style.css**, an **image/** folder, an **icons/** folder, and a **Screenshot/** folder. The screenshot folder includes desktop, tablet, mobile, and HTML/CSS code screenshots.

4. Design Approach

The design uses a cream and brown color palette with Arial typography. The layout uses a navigation bar, hero section, content sections, skill cards, project cards, contact area, and footer. Consistent colors and spacing are defined with CSS custom properties.

5. Website Features

• Home hero with name, role, introduction, profile image, and call-to-action links.
• About section with a short introduction, education summary, career interests, and professional goal.
• Skills cards for HTML5, CSS3, JavaScript, React, and GitHub.
• Education section showing Saylani Web Development and 2025–Present.
• Three project cards: Portfolio Website, Calculator App, and To-Do List App.
• Contact details, social links, and a contact-form interface.
• CSS smooth scrolling, hover transitions, and responsive media-query rules.

6. Responsive Design

The stylesheet contains responsive breakpoints at 992px, 768px, 600px, and 380px. Desktop, tablet, and mobile screenshots are included in the project. The layouts should still be manually tested in a browser at the target screen sizes before submission.

7. Project Links

GitHub repository: https://github.com/Madihakhan612/Portfolio
Portfolio demo link referenced in project: GitHub Pages portfolio

8. Testing Notes and Items to Verify

The source files were reviewed for documentation. Before final submission, replace the sample email address (madiha.khan@example.com) and sample phone number (+92 300 1234567) with real contact details. Verify education details and all external links. The contact form is currently a front-end UI only and does not send messages to a server. The HTML contains an extra closing section tag and repeated footer markup near the end; clean these up and re-test the page. This report does not claim that browser interaction or all links have been independently tested.

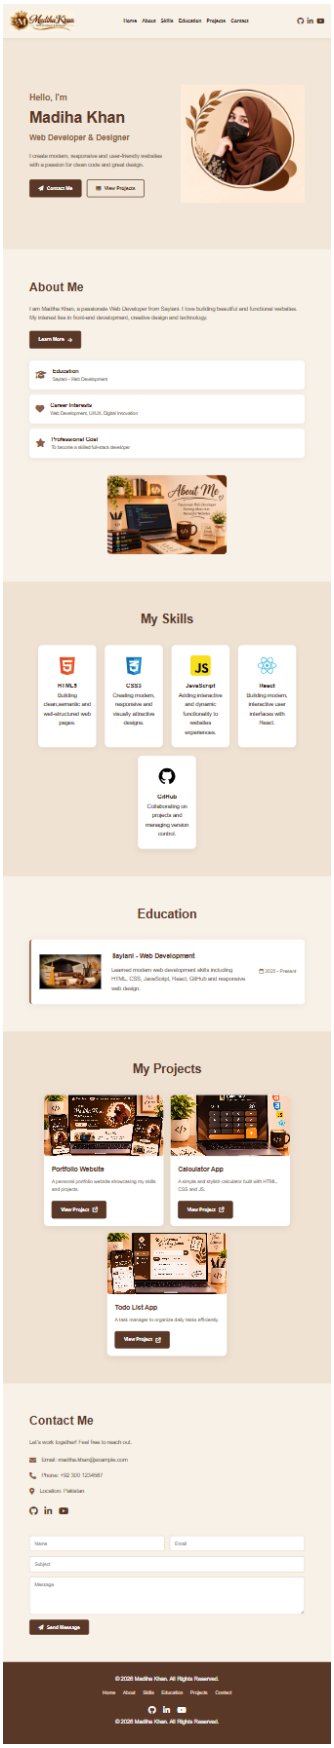

9. Conclusion

The submitted portfolio source includes the requested main content areas and three project cards, along with responsive CSS rules and supplied screenshots. Completing the verification items above will make the documentation and submission more reliable.

10. Desktop Website Screenshot

11. Tablet Website Screenshot

12. Mobile Website Screenshot

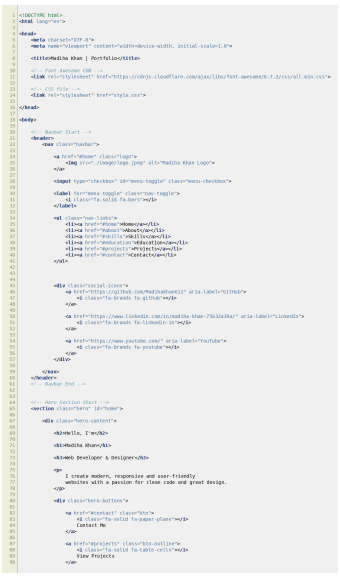

13. Code Screenshots
